## **RSP22**

### **Cephe Kaplama Sistemi**

Cladding System

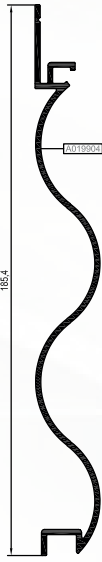

- **RSP22, ASAŞ'ın sürdürülebilir bir gelecek vizyonu ile dünya mimari trendlerine uygun olarak tasarladığı cephe kaplama sistemlerindedir.**
  - 22mm derinliğindeki pratik geçme prensibine sahip, derzsiz, tema ritmini devam ettiren, dekoratif, mimari soğuk cephe kaplama sistemidir. Az katlı yapılarda, giriş lobilerinde, bahçe ve verandaların düz sağır yüzlerinde kullanılabilir.
  - **RSP22, alternatif cephe kaplama sistemlerine göre montaj kolaylığı, yangına dayanım direnci (A1 Sınıfı) itibariyle öne çıkmaktadır.**
  - Üçgen siding, su dalgası, yarım altıgen ve farklı ölçüde kurgulanmış briket formu desen opsiyonları mevcuttur. Mimari beklentiye göre talep edilecek yeni kalıplarla yeni formların da uyarlanabileceği, geliştirmeye açık bir sistemdir. Bütüncül bir yaklaşımla sistemde kenar, ara geçiş ve modülasyon profilleri de mevcuttur.
- **In accordance with world architectural trends, RSP22 is one of the facade cladding systems designed by ASAŞ with the vision of a sustainable future.**
  - It is an architectural cold facade system that has 22mm depth practical interlocking principle, is joint-free, decorative and continues the theme rhythm. It can be used in low-rise buildings, entrance lobbies, and flat blind faces of gardens and verandas.
  - **RSP22 stands out compared to alternative facade cladding systems with its ease of installation and (Class A1) fire resistance properties.**
  - Triangular siding, water wave, half hexagon and briquette shaped pattern options of different sizes are available. System is open to development, where new molds and new forms can be adapted as requested according to architectural expectation. With a holistic approach, the system also includes edge, transition and modulation profiles.
